

NATURAL AND SUSTAINABLE ENVIRONMENTS!

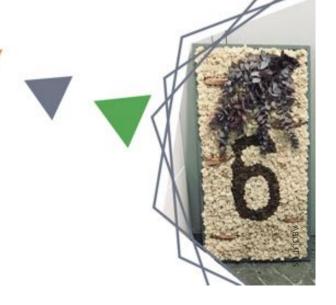

About Us Services Products Clients Contact

The art of applying natural preserved flowers, plants, moss and foliage to furnish and redefine interiors.

We enhance, furnish and redefine interior spaces of public buildings, offices, hotels and private residences.

Hand-made plant compositions made from natural preserved flowers, plants, moss and foliage, come to life on all types of walls, surfaces or as exclusive decorative elements.

WE ARE NOT IN THE BUSINESS FOR RUN-OF-THE-MILL PRODUCTS!

A HEALTHY AND PRODUCTIVE LIFE

We are committed to the return to values such as the bond with nature. Aesthetics and well-being play an important role in the creation of alternative, health-promoting interiors.

The diversity of nature offers inspiration for the object to be greened and is the perfect model for the design of living spaces. We let nature grow on the vertical wall.

Lively mural paintings emerge in a variety of shades and colours. Such transformed rooms positively change the room climate. A revitalising breathing air in turn promotes well-being and increases performance.

Concepts for a healthy and productive life!

PRODUCTS

Preserved forest moss is often used as the base for these types of walls except for the full coverage wall whereby the wall is entirely covered in your preferred foliage.

The level of volume depends on your preferences, budget and what you wish to achieve.
This can be adjusted accordingly.
Just like you can define your green tone or other colour shades and the type of foliage to be used.

Shape and size, hanging or climbing, framed or free, KONTOR 202 is at your side.

THE PRESERVED PRODUCT

Our natural products are meticulously preserved by using different techniques for each type of plant to ensure the best possible outcome in terms of aesthetic and durability.

The preserved products are 100% natural whereby the natural sap in the plants is replaced by a 100% biodegradable conservation liquid. The colours are achieved through food dye.

Our products require no watering nor any sunlight to sustain their beauty, thus no care or maintenance.
